

"See Your County Agent!"

People seeking information about any one of thousands of perplexing questions frequently are told: "See your County Agent!"

Their problem may be an insect invasion of a large agricultural field, or of their backyard.

It may be the problem of a young mother: "How do I remove grass stains from clothing?"

Or, producers and bankers may wish to solve a farm business situation by converting to an electronic record keeping system.

Or a homemaker may want to know: "Do I really provide my family with well balanced and nutritious meals?"

Who is the County Agent?

He is your "pipe-line," your direct contact, with the resources of the University of Arizona . . . the College

of Agriculture . . . the School of Home Economics . . . and the U.S. Department of Agriculture.

He's your own local contact for all of these groups with the vast storehouse of knowledge from these sources. And, if he doesn't have the answer to your questions . . . or your problems, he knows how to contact people who may have the answer.

Who is your County Agent?

Each county, including the one you live in, has a county Extension office. In each office is at least one man who is the Extension Agricultural Agent, and one woman who is the Extension Home Economist. They both are members of the University of Arizona's Cooperative Extension Service.

The name Cooperative Extension

Service may seem somewhat difficult to grasp until you know how the Service works.

First, it provides a staff of specially trained personnel in each of the state counties who are backed-up by a staff of specialists at the university.

Second, this staff works cooperatively with research and teaching faculty of the university in gathering useful information which may be of benefit to you, the citizens of Arizona.

Third, this information is sent out to the County Extension Agents who must adapt it to your county conditions . . . extending the arm of the University of Arizona into your home or business.

And fourth, the County Extension Agricultural agents and Home Economists stand ready to provide you with the answers to the many questions you present to them each day.

Occasionally you will pose a question to which there is no immediate answer. He or she will try to find someone who is able to answer the question, or if the situation warrants attempt to initiate research to find out the answers to the question.

And on occasion, even then, there may be no answer.

But, we suggest you try us. You probably will be pleasantly surprised.

Your Extension office is located at one of the following places:

Casa Grande	City-County Bldg.
Sacaton	Extension Bldg.
Duncan	Francis Bldg.
Flagstaff	Courthouse
Tuba City	B.I.A. Admin. Bldg.
