

Agriculture College is yours to use

"It's your College of Agriculture!"
"We hope that you will use it."

That briefly describes your College of Agriculture at the University of Arizona.

It serves the people of the entire state.

The U of A is a part of the Land-Grant College System. Designed to provide equal rights and opportunities in education for all, these colleges were authorized by a legislative bill known as the "First Morrill Act." The bill was passed by Congress and

signed into law by President Abraham Lincoln, July 2, 1862.

The faculty and staff of your college of Agriculture are dedicated to serving all citizens of Arizona. And for this reason consider the entire state as a part of the University of Arizona campus.

Characteristically your College of Agriculture has three integrated parts, or divisions. These are Resident Instruction, Agricultural Experiment Station, and Cooperative Extension Service.

Many of your sons and daughters have taken, or will take, advantage of the excellent faculty and curriculum in agriculture and home economics to work towards earning a degree in one of the many available disciplines.

These youthful students as well as many farmers and ranchers in Arizona will become acquainted with and utilize the services of the other two divisions.

The Agricultural Experiment Station has for 80 years provided research to improve crop and animal stocks and varieties, production practices and the marketing of agricultural products. Research at your College of Agriculture accentuates problem orientation. Such experimentation provided the research basis for Arizona agriculture as we know it today.

Only research of a high order can give us the agricultural information so definitely needed. There are many things which the grower can do himself, but there are many other things best accomplished by the research unit in your College of Agriculture.

The work performed by the Cooperative Extension Service, the third division of the College of Agriculture, is probably better known to you, because the County Agricultural Agents, Home Economist and 4-H Club Agents are working in each of your counties.

Their function is to carry the large amounts of information developed in the Agricultural Experiment Stations and at the U. S. Department of Agriculture to the growers in the field.

This bird's eye view of your College of Agriculture of your State Land-Grant University — the University of Arizona — is meant to encourage you to continue using the services of the College of Agriculture. Visitors are always welcome here, and inquiries by mail will receive careful attention.
