State County Agent/Leader.

## SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY AGRICULTURAL AGENT'S ANNUAL REPORT.

The annual report is a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the agricultural activities of the county agricultural agent for the year. The making of such a report is of primary value to the county agricultural agent and the farm bureau officers and members.

The report should be a statement in orderly fashion, and under appropriate subheadings, of the work done, methods used, and results secured under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relating to each project, the results reported in the statistical summary for the project should be analyzed, conclusion drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The statistical summary will grow naturally out of the field and office records.

The following plan is suggestive of how the report may be clearly and systematically outlined:

### SUGGESTIVE OUTLINE OF ANNUAL REPORT.

- I. Cover page.
- II. Title page.
- III. Table of contents.
- IV. Status of farm bureau organization.
  - (1) Form of organization—distinctive features.
  - (2) Function of members, officers, and committees in developing the program of work.
  - (3) General policies, including relationships to other organizations.
- V. Program of work—methods employed and results achieved.
  - (1) Factors determining program.
  - (2) Project activities and results—
    - (a) In the development of the farm bureau during the year.
    - (b) In soil improvement.
    - (c) In crop production.
    - (d) In live stock production.
    - (e) In farm economics.
    - (f) In marketing (buying and selling).
    - (g) In farm home betterment.
    - (h) In Boys' and Girls' Clubs.
    - (i) In other project activities.
  - (3) Character and scope of office and field service.
  - (4) Analysis and interpretation of tabular summary, pp. 18, 19.
- VI. Outlook and recommendations (including suggestive program of work for next year).
- VII. Summary of activities and accomplishments (preferably of one or two typewritten pages only placed at the end of the narrative report).

### STATISTICAL SUMMARY.

To supplement the narrative of the report, and in order that comparable State and National summaries can be made, it is necessary that each agent include a statistical summary of the work in his county. The following blanks have been prepared to insure uniformity in method of reporting. In addition to the questions asked under each subdivision of the report, space is provided for the State to add other questions of State-wide importance. Additional room is also provided for each county agent to add other important statistical information not covered in the series of National and State questions. For the sake of clearness the questions are arranged in the same order as suggested for the narrative.

A test was made with acid phosphate on alfalfa which had been planted in late fall on land that had been in cotton for several years. While a good stand was secured the plants made very poor growth. The cooperator was furnished enough acid phosphate to make one application at the rate of 450 pounds per acre, on a strip 600 feet long and 20 feet wide in the poorest part of the field. No data on yields was secured, but it was conservatively <sup>estimated</sup> that the treated strip had an increased production of 300 percent. The cooperator and several neighbors are going to fertilize alfalfa as a result of the test. The test will be continued this year using super-phosphate.
