

QMS data coding/ script

Files will be identified as: ACAD number_gender_year y month m_r record number

e.g. ACAD 3 (m) at the age 5;7, for record 14 would be: **ACAD3_m_5y7m_r14**

If a record (or single word) was not attainable, the correctly named file will still exist, but the recording will be an adult voice saying "no data."
