4-H CLUB WORK

COUNTY SITUATION

The Amphitheater community continues to be a strong 4-H club district and clubs in the area are growing rapidly. Good leadership has always been available in this community in both boys and girls 4-H club work. The exact number of rural or suburban youths of 4-H club age is not known but is probably much greater than the number 9 enrolled in 4-H club work. During the 1949-1950 club year there were 37 girls and 23 boys enrolled. Of this group, 33 girls and 21 boys completed their project work. This is a completion of 90%, probably the best completion record in the county. Boy Scouts, Girl Scouts, Key Club and several in-school "subject matter" clubs compete with 4-H for the youngsters' time.

Recreational facilities in Amphitheater are good. Whetmore Park provides facilities for picnics, ball games, swimming, etc. A roller skating rink is also located in this community. Numerous riding stables are available also.

There are two agricultural 4-H clubs in Amphitheater. They are the Sahuaro 4-H club led by Mr. Harold Dalrymple and the Amphitheater 4-H club led by Mr. O. W. Dishaw. Mr. Dalrymple was assisted during the past year by three junior leaders, John Hand, John Doty and Jack Dalrymple. All three of these junior leaders attended the 1950 Leaders Training Camp at Payson in July, 1950. These boys have made good use of this training in their current club program. The Sahuaro Club has adopted a health activity as outlined at Leaders Camp. A written club program is now a standard tool used by the Sahuaro Club. Mr. Harold Majesky, who led the club in the 1949-1950 year, gave up leadership of the club to Mr. Dalrymple in May, 1950. The leader has done an excellent job in leading the club. Mr. Majesky gave up leadership because his associations with Moose Lodge and with Amateur Radio Clubs would not allow him time to lead the 4-H club.

Agriculture in the Amphitheater community is limited to small, part-time farming enterprises and is not a major source of income. The size of these suburban homes ranges from $\frac{1}{2}$ acre to 30 acres. Alfalfa and permanent pasture are the chief crops with some sudan grass in the summer.

A vocational agricultural department has been organized in the Amphitheater High School effective July 1, 1950. Twenty-nine boys are enrolled. The Vo-Ag teacher is Mr. Hendricks. This department was organized as a result of a petition of 16 boys in the Amphitheater High School. Mr. Hendricks and the assistant agricultural agent have agreed to see that projects are not duplicated for any one club member.

The Amphitheater 4-H club had 2 junior leaders enrolled in 1949-1950. These were Ed Guitteau and Loren Mann. The latter failed to

4-H CLUB WORK (continued)

Page 2

COUNTY SITUATION (continued)

complete his project and is no longer in 4-H club work. Enrollment for 1950-1951 seems to be about 14 as compared to 11 last year. There are no junior leaders enrolled in the 1950-1951 club year.

There were two 4-H club members, however, in Amphitheater in the past year. The Cactus Wrens with 16 club members enrolled was led by Mrs. Harold Majesky. During the summer the group was led by Mrs. G. Everson. These girls carried clothing projects. The club has been very active and has had an outstanding health program.

The Amphiettes 4-H club with 15 members enrolled was led by Mrs. P. E. Guitteau with Josephine Guitteau as junior leader. Josephine attended 4-H Leaders Conference representing her club.

Arivaca - The arivaca 4-H club had 6 members enrolled during the spring and summer, all of whom carried a camping project. This club was led by Mrs. Emma Townsend, a teacher in the Arivaca School. Arivaca is a small mining and ranching community located approximately 40 miles out and 15 miles west of Tucson. The school is a small one-teacher school with about 10 students enrolled. Community spirit is good but it has been hard to find a leader who was willing to comply with 4-H club rules rather than make her own rules. However, during the past year the camping project was well received by the club members and a good job would have been done had not the leader been called away because of illness in her family. In spite of this the members were able to complete their project.

There seems little chance for expansion of the 4-H club program in this community. Agricultural projects do not do well here because club members live such great distances apart. This makes it difficult for a leader to hold the club together and to visit projects. At present there are no plans for club work in Arivaca in the coming year. The population is about 60% Spanish American and Mexican.

Blenman - The Blenman community is a northeast suburb of Tucson with most of the club work located east and northeast of the Blenman school. There was one girls' 4-H club in this community during the past year. This was a foods club which was led by Mrs. K. L. McKee during the winter. During the summer the club carried foods under the leadership of Mrs. Callaghan. During the coming year the club will be led by Mrs. Lewton. Eleven members were enrolled during the 1949-1950 year. Nine of these 11 completed their projects.

Binghampton - The Binghampton community is not well defined geographically. For this reason it is hard to determine how many potential club members are in this area. The children attend Davidson Elementary School, Catalina Junior High School and Tucson High School. However, there are undoubtedly quite a number of youngsters of club age who

4-H CLUB WORK (continued)

COUNTY SITUATION (continued)

have not been reached by the 4-H club program as yet. Competition from other youth organizations tend to limit the enlargement of the 4-H club program in this community. Leadership has been difficult to obtain in this community of both boys and girls club work. During the past year Mr. John Dayton led the Catalina Agricultural 4-H club which had 11 members. Ten of these completed their project work. However, Mr. Dayton, who received his National Leadership Pin this fall for 10 years of club leadership, will not be able to lead the club this winter. Mr. Lester Woods will lead the club and he shows promise of being a good leader. Mr. Woods is a dairyman in the Binghamton community.

The Busy Stitchers girls 4-H club was led by Mrs. Lester Woods with 8 club members. Five of these completed their projects. Mrs. Woods does not feel she has time to lead the club this winter because of family responsibilities. Another leader will have to be found for the club.

Club work in this community could easily be increased if good leadership becomes available. The members of the agricultural club have never been very active in county judging events and in demonstrations. Aggressive leadership could overcome much of this. Jim Cowley, who was a junior leader in the Catalina club for 1949-1950, has moved out of the community.

Colonia del Valle - This new subdivision of eastern Tucson is in no sense a farming district. Agricultural projects can never be anything but back yard in scope. The Baptist Church has an active young people's organization in the community, while Boy Scouts have had a rather inactive membership.

The Desert Valle 4-H club with 9 members was led by Mrs. George Ammon. Leadership has been only fair because Mrs. Ammon works as a nurse and also has a large family of her own. However, Betty Meads, one of the older club members, has shown a great deal of interest in junior leadership. She attended Leaders Conference in 1950 and has done most of the active leading since that time. The club has organized a good health program using the Wetzel Grid to record height and weight development. The assistant agent arranged a loan of \$14.00 to Johnny Strand of this club to start a poultry project. This project has been successful and is well worth the extra effort necessary to get the youngsters started. Home beautification and gardening, as well as poultry and rabbits, are typical projects.

The Home Demonstration Agent met with some of the girls and their parents in an attempt to organize a girls 4-H club in this district. However, because leadership could not be found, the club was never organized. If such leadership is found, a good girls' club can be organized in this community since there is very little competition

COUNTY SITUATION (continued)

from other youth groups. Recreation has become a regular part of the club program in this community as a result of a Leaders Training Conference.

Continental - This rural community 29 miles south of Tucson had no 4-H club work during 1949-1950. However, a club has been organized under the leadership of Mrs. Virginia Gagnon of Sahuarita for the coming year. This will be an agricultural club with poultry and rabbits as projects.

There is no competition from any other youth groups in this community. On the other hand, club work is usually difficult to promote because of two unfavorable conditions. First, corporation farming predominates and only a small number of farmers live on their farms. Secondly, the population is an unstable transient population for the most part. Also, the population is predominately Spanish American. These people are rather poor and the parents are reluctant to part with funds necessary to start a 4-H club project. This is a cotton producing community and carries with it all of the social evils usually connected with this type of farming on a large scale.

Flowing Wells - The Flowing Wells Community had two 4-H clubs during 1949-1950. The Cloverleaf girls club had 21 members with 19 clothing projects, 11 food preparation and 2 junior leaders. The girls were led by Mrs. Porter, one of the parents. The agricultural 4-H club with 21 members was led by Mr. Arthur Smith. He has done an excellent job of leading the club. He has had 2 junior leaders, John Harrison and Larry Hunts, to assist him in leading the club and an outstanding improvement in the club program has been achieved. A written club program plan is used in the agricultural club. Participation of club members in county 4-H activities has been excellent in both boys and girls club work.

4-H clubs are more active than any other youth group in this community. Boy Scouts have some membership.

Agriculture in this community is composed of small farms from 1 to 60 acres in size and 4-H agricultural projects have little opportunity for expansion in size. During the last year a large poultry plant with 5,000 layers in cages has started operation. There are 2 dairys in the community. One of these, the Fairview Dairy, has two boys in 4-H club work and these boys have an opportunity to expand their projects.

This community is growing rapidly and promises to be an outstanding 4-H club community so long as good leadership is available.

Ft. Lowell - One agricultural 4-H club and 1 girls 4-H club was active in this community in the past year. The Ft. Lowell agricultural

4-H CLUB WORK (continued)

Page 5

COUNTY SITUATION (continued)

club, led by Mr. Phil King, has done a fair job and promises to improve. However, membership will probably be no more than 7 or 8 during the coming year. The girls 4-H club was led by Mrs. George Bideaux. This was a small club with food preparation projects. The Ft. Lowell community is principally a residential district with only one or two farms along Rillito Creek. These are owned by wealthy people who have no children in club work. The Ft. Lowell Elementary School serves the community. Prospects for expansion of club work are definitely limited.

Marana - The Marana community is almost entirely a cotton and ranch community. It includes the communities of Cortaro and Rillito. Very little livestock other than range stock are produced.

Boy Scouts are active in this community and Future Farmers of America and Future Homemakers of America have chapters in the Marana High School. Recreational facilities are limited to school playground equipment and school dances.

Leadership has been a very difficult problem in conducting 4-H club work in this community. Mr. Charles Harmon, Vo-Ag teacher, led the group in the past year but the quality of club meetings and the club program as a whole was mediocre. This was due to the fact that meetings were held in school during school hours and were limited to 45 minutes. This situation has been corrected for the 1950-1951 club year. Mr. Harold Reyher, a young cotton farmer, has agreed to lead the agricultural club for the coming year. The assistant agent met with Mr. Reyher and 6 club members and organized the Marana 4-H agricultural club. Meetings will be held every two weeks with alternate meetings being held at the school house, while all others are held at one of the club members' homes.

Marana Home Economics club had 36 members, 17 of which completed. The club was led by Mrs. Gladys Powell, the Home Economics teacher. Junior leadership played an important part in holding the club together.

The principal problem in regard to club meetings in the Marana community arises from the fact that the members live such great distances apart.

Possibilities for future expansion of 4-H club work are limited although there is some hope in the fact that more farms are being bought rather than leased. This should lead to a more stable agricultural population.

National City - This is one of the poorer residential sections of Tucson. Club work has never been very promising and proves very discouraging in this district. The National City agricultural club had 10 members enrolled while only 6 completed. This club was led by

COUNTY SITUATION (continued)

Mr. and Mrs. Wm. L. Gidley. The club carried agricultural projects during the winter but carried camping during the summer. None of the camping projects were completed.

The girls clothing club with 16 members completed only 3. Completions have been low because of the transient population and because of apathy on the part of parents.

Santa Cruz Community - This community had 7 girls enrolled in a food preparation club, with 1 junior leader. Mrs. Phebus led the girls club with 5 completing their projects. This community lies along the Santa Cruz River at the junction of the Ajo and Mission roads. The community is both residential and farming but there are very few farm youngsters of club age. The boys in this community are in a combined club called the Sunnyside Panthers. This club was led by Alfred Austin and John Colvin, two University of Arizona students. Club work showed much improvement, particularly in the interest taken by parents during the last year.

Sopori - Club work in the Sopori community met with no success during the past year because of lack of leadership. However, leaders have been found for the coming year. Mr. and Mrs. Loren Fiegel, teachers at the school, are going to help with the club. Also, Mr. and Mrs. Sam White will lead the boys and girls clubs. Mrs. White led a girls club the past year by taking them for each meeting to the Amado School.

This community is at least 70% Spanish-American in population and apparently these people are rather stable and are more interested in their children's welfare than is usually the case with Spanish-Americans.

Agriculture in the Sopori community consists of cattle ranching, farm gardens and small fruit orchards. Mining is also carried on.

Sunnyside - This suburban community, 6 miles south of Tucson city limits, has always been rather active in 4-H club work. However, agricultural projects are of the back yard variety while girls club has been in school up until the 1949-1950 club year. The boys club was combined with the Santa Cruz community for the 1949-1950 club year with 14 members enrolled.

Three girls clubs were organized. The Hasty Basters with 8 members, Consolidated Dwellings with 7 members and Junior Miss with 5 members. These clubs carried food preparation except for the Hasty Basters summer projects. These were clothing projects. The Consolidated Dwellings folded up during the club year because of lack of leadership. The other clubs continued, with the Hasty Basters completing 5 winter projects and 10 summer projects. The Junior Miss club completed 4 of their 5 club member projects. They also completed 4 summer projects.

4-H CLUB WORK (continued)

Page 7

COUNTY SITUATION (continued)

Leadership is the biggest problem in conducting club work in this community.

Tanque Verde - The Tanque Verde community is a residential suburban community 17 miles east of Tucson. Practically none of the farms are self sufficient and all are on a small scale. Part time farming is the rule with dude ranching as the major source of income.

The Prickly Pears girls club with 15 members enrolled was led by Mrs. Sheffer, one of the teachers at the Tanque Verde Elementary School. This club completed only 4 of their 15 projects. The club will be led during the coming year by Mrs. Addison and Irene Campos.

The Tanque Verde insect club with 15 members was led by Mrs. Margaret Schreiber, a parent in the community. She did an excellent job and completed 11 members. Enthusiasm has been very high for 4-H club work in this community and wherever good leadership is available club work should succeed. Both boys and girls club work in this community is growing and parent interest is definitely on the increase.

COUNTY SUMMARY OF ENROLLMENTS AND COMPLETIONS

Two hundred six girls and 112 boys were enrolled for a total of 318 club members for 1949-1950. One hundred twenty-one girls or 58.6% completed their club work. Eighty-five boys or 75.9% completed their project work. A total of 206 or 64.9% completed their projects.

NARRATIVE SUMMARY

Twenty-four leaders and 35 4-H officers were instructed in proper procedure for conduct of club meetings and in the duties of club officers.

Ten junior leaders and 2 adult leaders attended the State 4-H club Leaders Conference at Payson. Three leaders training meetings for home economics 4-H club leaders were attended by 26 leaders and junior leaders. Specialists from the agricultural extension service assisted at these meetings by giving instruction in foods and clothing subject matter. Two leaders and 5 junior leaders attended a recreation training school at Tucson in December, 1949. Twelve club leaders are making practical use of written club program plans as a result of training given to leaders and junior leaders at the 1950 Leaders Conference.

Twenty-one boys and girls were enrolled in 4-H beef projects and 19 completed. Fifteen carried dairy projects and 13 completed. Only 2 carried garden projects, both of which completed. Three craft projects were carried in addition to other livestock projects, none of which were completed. Seventeen insect projects were enrolled with 12 completing. Eleven boys junior leadership projects were started with 8 completing. Five boys and girls completed home beautification projects out of 9 which were started. While 49 members carried poultry projects, only 31 completed. Thirty members enrolled with rabbit projects and 23 completed. Two sheep projects were begun and both completed. Three swine projects were completed out of the 4 that were started. There were 9 other livestock projects, 7 of which were completed. That category consisted in the main of dairy goat projects. One hundred seventy-two clothing projects were enrolled with 102 completing. Eighty-two food preparation projects were begun with 53 completing. Nine food preservation projects were started with 8 completing the work. Four home furnishing projects were begun but none completed. Seventeen girls junior leaders projects were enrolled with 7 completing. Thirteen camping projects were begun with 6 completing. A total of 469 projects were enrolled with 301 completing.

The percentage of completions for the 1949-1950 club year was 65%, an increase of 7% over the previous year. This low percentage of completions is due to loss of leaders during the club year and to the inexperience of new club leaders. Also, it is felt that perhaps the parents do not fully understand what is expected of the child in club work and what is expected of the parent.

Two leaders training meetings were held during the year to instruct leaders in the conduct of the club program and in proper organization of the 4-H club.

Sixteen boys and three girls from agricultural clubs attended the 1950 4-H club Round-Up at the University of Arizona in June. Seventeen girls of the home economic 4-H club attended this event.

One hundred ninety-six boys and 19 girls attended 1950 summer 4-H camp held at Camp Lawton.

Madeline Barley
Alvin Allen
Pima County
1950

NARRATIVE SUMMARY (continued)

The 4-H club program during 1949-1950 has taught 85 boys and girls to select good beef, dairy, sheep, hogs, rabbits and poultry. The assistant agent demonstrated judging of these animals in 6 demonstrations. Forty-three boys and girls took part in state judging contests as results of these meetings. One hundred thirty-seven boys and girls learned the use of safety around the farm and home as a result of 4-H club work. Two hundred five boys and girls were instructed in some phase of health and nutrition in their 4-H club program. Three hundred fourteen boys and girls learned better ways of doing farm and home work in connection with their agricultural and home economics projects.

Recreation training has helped 8 junior leaders to improve their own 4-H club recreation program.

Sixteen achievement programs were held in which approximately 900 club members, parents and friends took part.

The assistant agent and the home demonstration agent made use of koda-chrome slides and 16mm. sound movies in presenting an educational program to 4-H club members in Pima County. Circular letters, radio broadcasts, instruction at club meetings and individual visits to club members' homes were other methods used by extension agents to give club members instruction in subject matter, citizenship, etc.

During the 1949-1950 club year the assistant agent and the home demonstration agent have stressed the importance of working through club leaders and junior leaders to reach more club members.

Recreation has been an important part of the 4-H club program during 1949-1950. Two county-wide 4-H club parties and dances were held during the club year with approximately 350 persons attending. More and more clubs are combining recreation as a part of their regular 4-H club program.

Alvin Allen
Pima County
1950

ORGANIZATION AND PLANNING

Every new club which was organized during the 1949-1950 club year in Pima County was organized at the request of parents and youngsters in the community. When such requests reached the county extension office the person requesting the club was asked to find a leader for the club or to suggest a leader to the extension agent. In the event that the agent has to make all of the contacts to obtain a leader for the club, the agent visits the prospective leader and explains the purpose and nature of club work and asks the cooperation of the prospective leader in helping the community to start a 4-H club. The homemakers groups have been very helpful in providing leaders and in sponsoring clubs. An example of this is the Fort Lowell home economics 4-H club. It has not been necessary to call on P.T.A. organizations to support club work organized during the 1949-1950 club year. These organizations are only actively supporting club work wherever there is a need. All other clubs in the county were continuations of clubs organized previous to November, 1949. However, the communities of Lukeville, Vail, Continental, Sopori and Empire have requested new 4-H clubs for the 1950-1951 club year. These clubs were organized in August, September and October of 1950. In each case the persons requesting the club agreed to lead the club.

The Pima County 4-H Leaders Association met only once during the 1949-1950 club year and was not as active as in former years. However, this one meeting did result in very good cooperation on the part of parents and older club members in setting up the grounds for the 1950 County 4-H Fair.

Parents were contacted through home visits whenever possible. Time permitting, the assistant agent and the home demonstration agent try to visit each club member's home at least once or twice during the club year. It is almost impossible for the home demonstration agent to do this in addition to her adult work. At such visits the principal topics for discussion are financing of projects, importance of complete record books and full ownership of the project by the club member, recommendations for changes in sanitary practices, plans for the club member's future and other project plans. Also, the importance of parent cooperation is stressed at these visits. These personal contacts are very important and have resulted in the use of improved practices in care of club projects, improved relations between parents and 4-H program and maintained interest in 4-H club membership. During the past year the frequency of such visits has necessarily been reduced because of the two-county assignment given to the extension agent.

The assistant agent and the home demonstration agent met in January, 1950, with Mr. McKee, State 4-H Club Leader and Mrs. Kightlinger, Assistant State 4-H Club Leader, and planned a program of work for the county. This program outlined dates for county events, leaders training meetings, officers training meetings, etc.

Pima County
1950

11

LEADERSHIP OF 4-H CLUB WORK

Leadership of Pima County 4-H clubs during 1949-1950 continues to come from both teachers and lay teachers, however, only two teachers were used during the year. This reflects the trend of attempting to use more lay teachers and fewer teachers in the 4-H club program. It is expected that this trend will again be noted in the coming year. Approximately 90% of the leaders are also parents of club members or have children who will soon be of club age.

Junior leaders have continued to be of much more help in the conduct of the local 4-H club programs during 1949-1950 than in previous years. Leaders and junior leaders continue to be very enthusiastic in regard to the value of the State 4-H Leadership Conference. This Conference was held at Payson in July, 1950. It is noteworthy that junior leaders have been instrumental in applying the 4-H health training received at Conference to their own local club program. Interest in the Wetzel Grid at Conference has carried over into local club programs. In addition, the home demonstration agent held a meeting of leaders and junior leaders in the county to explain the use of the Grid in measuring physical development of the child.

Leaders in Pima County 4-H clubs have served an average of two years. There were two new leaders in agricultural clubs and 6 new leaders in home economics 4-H clubs during the 1949-1950 club year. Comparison of the quality of work done by members and the quality of leadership exhibited by the leaders continues to indicate that no club will be any better than its leadership. One leader, Mr. John Dayton, completed his 10th year of service as voluntary leader during 1949-1950 and will receive the national award of a certificate and a gold pin.

Experience in Pima County seems to indicate that the most effective way of obtaining good leadership in communities where a 4-H club is requested by a parent is to give this parent the responsibility of finding a good leader. This results in one of three things: 1) if the parent is only luke-warmly interested in the club work, the matter will be dropped and the club will not be organized; 2) the parent may agree to lead the club himself or herself after duties of the club leader are explained; 3) the parent will suggest some person in the community who has desirable leadership qualities and perhaps has sympathy for the 4-H club program. In this event the agent and/or the parent can contact the person and can usually persuade that person to lead a club.

LEADER TRAINING PROGRAM

Training meetings for club leaders in the use of demonstrations has been found to be very effective in both agricultural and home economics 4-H clubs in Pima County. However, best results of this type of training have been obtained in training leaders of home economics 4-H clubs. This is probably due to two reasons: 1) leaders of such clubs are usually women who can attend leaders training meetings in the afternoon without too much inconvenience; 2) the nature of girls' 4-H club work lends itself well to demonstrations that can be done easily with a minimum of equipment at small club meetings. The assistant agent has conferred with Extension Specialists in dairy, poultry and livestock and this conference resulted in the conclusion that specialists can offer very little aid in leaders training meetings for agricultural club leaders. Leaders of agricultural clubs can make use of training in conduct of club meetings, proper enrollment of members, importance of reporting completions, how to secure parent cooperation and other points of general nature. However, subject matter instruction does not seem to be a valuable aid to leaders of agricultural clubs.

Individual conferences with leaders has served an important part in the 1949-1950 club program. By this means the agent becomes more familiar with local club problems and can assist the leaders and junior leaders in planning a written program of work for the local club. The assistant agent has noted a tendency for some leaders to relinquish too much of the responsibility of the club program in favor of the junior leaders. However, this is something which can be corrected usually by individual conferences with leaders.

LOCAL 4-H CLUB PROGRAMS

Achievement day programs were of two types in Pima County during 1949-1950. The first was the combined community type where 2 or more small communities held a joint achievement day where all of the clubs in one community held a joint achievement day. The second type is the individual club achievement day. In either type the assistant agent or the home demonstration agent has attended the achievement program and presented certificates and pins to members and leaders. Some clubs, such as the Flowing Wells 4-H clubs, went to considerable trouble to plan an interesting achievement program and to invite parents to the achievement day.

The use of written club programs is becoming more common in Pima County. There are 8 agricultural clubs and 10 home economics clubs which are using written programs. This has resulted in more interesting club programs. The club program has also been expanded to include more activities, such as health, safety, community service and recreation as a result of written programs. Demonstrations for judging have also become a part of the regular club program because of written program plans.

The use of demonstrations in local club programs was a weak point in the agricultural clubs in Pima County during the past year. This was reflected in the small number of participants in agricultural demonstration contests at the County 4-H Fair in March. More stress is being placed on this phase of the agricultural program for the coming year and leaders have been asked to assign demonstrations at the beginning of the club year and to ask the members to practice during local club meetings.

The Flowing Wells 4-H agricultural club initiated in that community the idea of an annual parent day. At this event the leader and club members held a small community fair in which members exhibited their livestock products. Parents were invited and the whole community turned out to assist in a community improvement project consisting of pruning and planting of trees on the school grounds. The Sahuaro 4-H club also held a parent day which was very successful. It did not include a community service activity. Parent interest and community interest was very noticeable.

4-H ACTIVITIES

4-H FAIR

The 1950 4-H Fair was held March 24 and 25. Twenty-two fat beef animals, 10 dairy animals, 9 sheep, 5 fat swine, 65 poultry, 80 pigeons and 37 rabbit exhibits were shown by 90 4-H club members. Quality of exhibits was up in all departments, the poultry exhibit being outstanding. The exhibits of dairy goats which included 6 entries indicated a trend towards more interest in this project.

The Tucson Chamber of Commerce sponsored this event by allowing use of the fair building and contribution of \$149.00 to the Pima County 4-H Educational Fund. Part of this money was used to pay \$6.20 towards the expenses of delegates to 4-H Club Round-Up. These delegates were chosen from judging events at county-wide field day for agricultural clubs and delegates from home economics divisions were chosen from judging events held during the 4-H Fair. This latter arrangement did not prove satisfactory.

4-H club leaders and junior leaders, as well as older club members, assisted in preparing the fair building previous to the Fair. Members were not asked to clean up the building after the fair since it was too difficult to contact enough members to make a fair allocation of work.

The 1950 Fair was held in conjunction with the Tucson Livestock Show for the first time. This was a very successful arrangement in so far as the agricultural division was concerned since a larger crowd saw the 4-H exhibits and since the auction of fat 4-H livestock was the most successful in many years. The auction of this livestock was held at 8 o'clock on a Friday night with Mr. Charles Adams, who was also auctioneer for the Tucson Livestock Show Sale, auctioning the 4-H livestock. Mr. Adams did a remarkably good job with the top hog selling for 76¢ a pound and the top beef animal selling for 92¢ a pound. The sale of beef averaged 48¢ a pound for the 22 head. At the suggestion of 2 leaders of the Southern Arizona Rabbit Breeders Association the assistant agent agreed to a special event in which 2 pedigreed rabbits were auctioned prior to the general livestock sale. These 2 breeders donated the rabbits and proceeds of the sale went to a camp fund to send 4-H club members to summer camp who could not otherwise afford to go. This event was remarkably successful in that these two rabbits were bought and resold several times so that a total of \$175.00 was realized from their sale.

Facilities for the home economics division at this fair were not desirable. The buildings are too large making it difficult to control the youngsters during demonstration contests and judging events. The Pima County homemakers sponsored a food concession at this Fair from which \$66.00 was realized and donated to the Pima County 4-H educational fund.

The date on which this Fair was held was a little early for completion of the home economics projects. Participation on the part of girls in the demonstration and judging was very good. In the girls divisions

4-H ACTIVITIES (continued)

4-H FAIR (continued)

The Fair catalogue was mimeographed in the extension office and while an attempt was made in improving the book, there are other improvements which need to be made. These have been noted and will be considered for the 1951 Fair.

COUNTY FAIR

The 1950 Pima County Fair again had a 4-H club division but participation in the agricultural division was not as good as in the 1949 Fair. However, since there was less space available for exhibits, this arrangement was very satisfactory. This event was held October 19 to 23. Unfortunately exhibits were held over for the 23rd, a Monday. This practice was very unnecessary since little attendance was recorded on that date and it greatly inconvenienced exhibitors. Agricultural exhibits numbered 12 sheep, 10 dairy goats, 8 dairy cattle, 29 rabbits, 32 chickens, 4 pheasants, 10 turkeys, 17 pigeons, 7 water fowl, 9 insect collections and 12 insect posters.

The Rodeo Drive-In Theater again presented a gold loving cup and a \$10.00 cash award to the club member earning the greatest number of sweepstakes points. Barney Hunts, Flowing Wells 4-H club, won the award again with a score of 640 points in sheep and poultry exhibits. He will have permanent possession of the cup if he wins it one more time.

Participation of girls in the home economics division was very good. Several of their exhibits were sent to the State Fair after earning blue ribbons at the County Fair.

4-H ROUND-UP

Nineteen boys and 19 girls attended the 1950 4-H club Round-Up at Tucson, June 6 to 10. The home demonstration agent felt that the girls division was very good and the only criticism that could be offered would be in the value of the breakfast showmanship contest. Leaders have questioned the value of such a contest. In the girls dress review contest Josephine Guitteau and Donna Adams both won blue awards with Barbara Majesky winning a red award for the best dress class. Pima County's junior food preparation judging team earned a blue ribbon and the senior clothing judging team earned a blue ribbon. The junior clothing team earned a red ribbon and the food preparation senior team demonstrators earned a red ribbon while the junior team earned a blue ribbon in this division. Barbara Majesky earned a blue ribbon in senior individual clothing demonstration.

In the agricultural division the senior rabbit judging team earned a white award, the senior poultry judging team earned a red award. The junior poultry judging team won a blue award and the senior livestock judging team earned a red award. The junior livestock judging team earned a red award, the senior dairy judging team earned a white award

4-H ACTIVITIES (continued)

4-H ROUND-UP (continued)

while the junior team earned a red award in this division. In dairy showmanship contests Larry Hunts and Dudley Guitteau earned a blue award while Larry Roberson and Larry Mann earned a red award in the B showmanship contest. In the livestock demonstration contest Larry Roberson and John Doty earned a red award and in the dairy demonstration contest Dudley Guitteau and Larry Mann earned a red award.

Expenses of delegates to this event were partially defrayed by a contribution of \$6.20 from the Chamber of Commerce contribution to the Pima County 4-H Educational Fund.

If the percentage of awards could be speeded up, it would greatly improve the Round-Up program.

4-H CAMP

The 1950 4-H summer camp was held at Camp Lawton on Mt. Lemmon August 5 to 10. Nineteen boys and 19 girls from Pima County attended this event. A bus was chartered from the Sun Valley Bus Lines to carry campers to and from camp. Total transportation charge was \$68.23. Each club member was assessed transportation fare of \$1.75 with the exception of a few members whose parents took them to camp. Baggage was transported to camp through the courtesy of the Arizona State Highway Department. The Midway Drive-In Theater contributed \$150.00 for use in sending 15 club members to camp who could not otherwise afford to go.

The camp was run very smoothly except for some trouble with the dishwashing. However, this was soon corrected. A very interesting camp program was enjoyed by everyone. The home demonstration agent suggests that in addition to the dishwasher, a cook's helper be employed to help in the kitchen with the dishes. It is also felt that the craft instructors have enough to do to take care of their classes without assuming additional duties at 4-H camp.

STATE FAIR

Pima County winners in the agricultural 4-H clubs at the 1950 State Fair are as follows: Junior poultry team won a first place award. The team included Roger Wiggins, Arthur Smith and Deanna Dalrymple. Miss Dalrymple also was the second high individual in the state in this competition. In the senior poultry division a team composed of John Harrison, John Doty and Fred McAnnich won first place. McAnnich was second high individual in state competition. A junior livestock judging team including Larry Mann, Karen Malone and Dudley Guitteau, won a second-place award. Guitteau was second high point man in the state contest. A team consisting of Josephine Guitteau, John Kinney and Larry Roberson won the second place award in senior livestock judging. In junior rabbit judging a

STATE FAIR (continued)

team composed of Douglas Baker, Tommy Herr and Bobby Hough won the top award. Herr was second high individual and Hough third high individual in the state competition in this division. A team including Herman Nelson, Cecil Jones and Robert King won the second place in a senior rabbit judging contest. King tied for high individual in this contest. Fred McAnnich, David Doty and John Hand were third place winners in senior dairy judging. In junior dairy judging, Dudley Guitteau, James Tivis and Anita Hand won a third place award.

The winners in the girls home economics 4-H clubs are as follows: A senior clothing team placed second. It included Barbara Majesky, Betty Jo Robson and Joyce Thurston. Junior clothing team won first place. It included Ramona Meuller, Velma Johnson and Sally Majesky. Miss Majesky was high point girl in the state in this division. Senior foods team won second place. The team was composed of Sybil Longly, Betty Jo Robson and Zona Wade. In the junior foods section the Pima county team placed third. It was composed of Loretta Mann, Ramona Meuller and Lillian Rhuellling.

LEADERSHIP TRAINING CONFERENCE

The second annual leadership training conference was held near Payson, Arizona at Camp Geronimo, July 26 to 29, 1950. Eleven junior leaders and 2 leaders from Pima County attended this event. This conference was very informative and it is noteworthy that participation of leaders and junior leaders in the discussion and in the presentation of the program was very good. Leaders have suggested that instead of centering so much time around square dances in the recreation training that some instruction in ballroom dancing be given for the benefit of older club members who could pass this information on to younger members. This event was sponsored by the Sears Roebuck Foundation with leaders paying only their transportation expense to and from the conference.

COUNTY RECREATION SCHOOL

In December, 1949, a Recreation School for Pima, Pinal and Santa Cruz counties was held in Tucson under the direction of Miss Jane Farrell. Miss Farrell did an excellent job of instructing the group. Attendance was very poor, however, and this is attributed to the failure of extension agents to send out a second notice of the meeting before the event. This event was planned by the State 4-H club office.

COUNTY AWARDS PROGRAM

Participation of club members in the National 4-H club Awards Program for 1949-1950 was disappointing, especially in the agricultural divisions. However, in the home economics divisions Josephine Guitteau earned a trip to National 4-H Club Congress in the girls records division while Donna Adams also earned a trip for clothing achievement. John Doty of the Sahuaro Club earned a county award in the Wilson Meat Animal Contest for the second year. Deanna Dalrymple, in the same club, earned a county award in poultry achievement, while Betty Meads of the Desert Valle club earned a county award in home beautification. The Sahuaro and Desert Valle clubs won a recreational certificate for merit in recreational program. The Cactus Wrens and Desert Valle earned a health certificate for participation in the county 4-H club program.

Both leaders and junior leaders were asked at a county meeting to push the national awards program but very few members showed enough interest in the contest to complete the necessary forms for competition.

NATIONAL 4-H CLUB WEEK

The extension agents prepared a window exhibit at the local J. C. Penney Company in observance of National 4-H Club Week during March, 1950. This window was based entirely on girls 4-H club work.

OUTLOOK AND RECOMMENDATIONS

The outlook for 4-H club work in Pima County during the coming year is good with increased interest in club work shown in the smaller rural communities. Cooperation of local merchants and civic organizations continues to be good.

Probably the two weakest phases of the current 4-H club program will be lack of trained adult leaders in a few clubs and lack of parent cooperation in a very few clubs. Also, more stress must be placed on the use of demonstrations in local club programs.

It is not yet known whether the 4-H club at the University of Arizona will again be organized for the coming year. If this is done there is a good chance that more leadership will be found coming from this group. During the past year two leaders in agricultural clubs from this group did an excellent job.

During the year a county 4-H club council was formed. However, this is not a council in the usual sense of the term. It is an organization of local businessmen and 4-H club supporters whose chief interest is to promote and regulate certain affairs relative to the conduct of the annual auction of fat 4-H livestock. This group will be called upon during the coming year to assist in planning publicity for this event.

Support of local daily newspapers is still as good as can be expected of any daily paper but is not as good as is furnished by rural weekly papers in other areas.

MEMO TO: ALL 4-H CLUB OFFICERS AND LEADERS
SUBJECT: 4-H CLUB OFFICERS TRAINING MEETING

The date for the training meeting for 4-H Club Officers has been changed to November 16, 1950. All leaders and club officers should attend this meeting. Be a better club officer! Learn how to conduct your club meetings smoothly! This is your opportunity to improve yourself and your club!

WHEN: NOVEMBER 16, 1950
TIME: 7:30 P.M.
WHERE: FLOWING WELLS SCHOOL, WEST PRINCE ROAD
WHO: ALL 4-H CLUB PRESIDENTS, VICE-PRESIDENTS,
SECRETARIES, REPORTERS AND RECREATION
CHAIRMEN AND LEADERS
PROGRAM: "THE CLUB PRESIDENTS' JOB" - Madeline Barley
"THE CLUB SECRETARY - AN IMPORTANT POST"
Alvin Allen
"LET'S WRITE A 4-H NEWS STORY" - Dick Olson,
"Tucson Citizen"
"HAVE FUN AT YOUR CLUB MEETINGS"
Mrs. Ellen Kightlinger

Leaders, please give each of your club officers a copy of this notice and urge them to attend. If you have no recreation chairman, please appoint one for your club.

Sincerely yours

Alvin Allen

MEMO TO: 4-H CLUB GIRLS AND LEADERS

SUBJECT: JUDGING AT STATE FAIR

JUDGING PRACTICE FOR FOODS & CLOTHING

WHERE: Miss Barley's house, 1220 East Hampton
WHEN: 2 P.M., SATURDAY, OCTOBER 21
WHY: TO SELECT A JUNIOR AND SENIOR TEAM TO GO TO THE
STATE FAIR IN COMPETITION WITH GIRLS FROM OTHER
COUNTIES.

YOU MAY ENTER THIS CONTEST IF:

1. You were enrolled and completed in 4-H Club during
1949 - 1950
2. A junior is a girl who has reached her 12th birthday
but has not reached her 14th birthday by Jan. 1, 1950
3. A senior is a girl who has had her 14th birthday before
January 1, 1950.

Oral and written reasons may be required on any or all the classes.
The judges decide that.

CLASSES TO BE JUDGED

JUNIOR FOODS Muffins, menus, custards
CLOTHING Equipped sewing boxes, apron, slip

SENIOR FOODS Muffins, menus, cakes
CLOTHING Equipped sewing boxes, slip, dress.

Girls who expect to judge clothing, please BRING
JUNIOR Equipped sewing boxes, aprons, slips
SENIOR Slips and dresses

You may not have all of these articles, bring what you have and
try to borrow the others.

If you want to go to Phoenix on the teams you had better try out
for this judging practice. This will make you "grow tall and
handsome". Let the office know if you can come.

Sincerely yours,

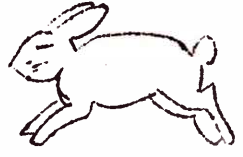

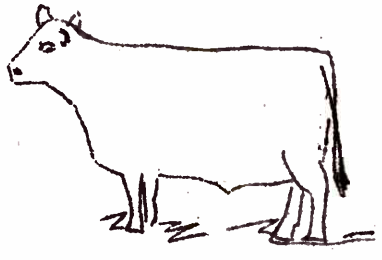

Madeline Barley
