

CORRIGENDUM

DANIEL C. DONATO and SCOTT H. TIMME

For related information on methods for milling log cross sections, such as those described by our recent paper (Donato and Timme 2012), we refer interested readers to highly relevant work describing analogous methods, published by J. Tröger, S. Martynenko, K. Schumacher, and F. Rinn in 2009, in German language (Tröger *et al.* 2009a, 2009b).
