

# 15th International Radiocarbon Conference

*Glasgow, Scotland*  
**15-19 August 1994**

The 15th International Radiocarbon Conference will be held in Glasgow, Scotland in the Royal Scottish Academy of Music and Drama (RSAMD) from 15-19 August 1994, the week immediately following the International Conference on Advances in Liquid Scintillation Spectrometry.

## The broad themes of the conference are:

$^{14}\text{C}$  in Archaeology  
Advances in Beta Counting  
Accelerator Techniques  
Calibration of the  $^{14}\text{C}$  Time Scale  
 $^{14}\text{C}$  As a Tracer of the Dynamic Carbon Cycle in Current Environments  
 $^{14}\text{C}$  In the Reconstruction of Past Environments

There will be both poster and oral sessions, with no parallel sessions. There will also be opportunities for exhibiting equipment, computer software and books. To complement the main conference program, a number of workshops will be held on the weekend of 13 and 14 August, on topics including  $^{14}\text{C}$  in soils, archaeology, and the  $^{14}\text{C}$  intercomparison (TIRI). Other workshop topics are currently under discussion. Accommodation, all within walking distance of the RSAMD, ranges from University Halls of Residence to five star hotels. A full social program is also planned, with a welcome party, civic reception, outing, and conference dinner.

## Submission of Papers

We welcome contributed papers within the broad themes outlined above. Authors will be required to submit a 500-word abstract for refereeing by the Scientific Committee. Within the time constraints posed by our aim of having no parallel sessions for all presentations, the committee will determine the appropriate session and manner of presentation for the accepted papers.
