

EDITORIAL STATEMENT TO CONTRIBUTORS

Since its inception, the basic purpose of Radiocarbon has been the publication of compilations of ^{14}C dates produced by various laboratories. These lists are extremely useful for the dissemination of basic ^{14}C information.

In recent years, Radiocarbon has also been publishing technical and interpretative articles on all aspects of ^{14}C . The editors and readers agree that this expansion is broadening the scope of the Journal. For 1980, the editors announce the publication of the proceedings of the 10th International Radiocarbon Conference that was held at Bern and Heidelberg, August 19-26, 1979. Volume 22, Nos. 2 and 3, 1980 will contain these proceedings.

Subscribers will receive these issues at no extra cost; non-subscribers may order the special publication separately. The price has not yet been determined. Volume 22, 1980 will include four numbers.

The editors would like to acknowledge with gratitude the help of Harry V. Merrick, Department of Anthropology, Yale University, for his careful editing of archaeological sections for Volume 21, No. 3, in the absence of Irving Rouse.

All correspondence, manuscripts and orders for the special issues should be sent to the Managing Editor, Radiocarbon, Box 2161, Yale Station, New Haven, Connecticut 06520.
