Tip Hudson

Hailey Wilmer

Publication information: *Rangelands* (ISSN: 0190-0528) is published bi-monthly by Elsevier, 230 Park Avenue, New York, NY 10169.

Orders, claims, and journal inquiries: Please visit our Support Hub page <https://service.elsevier.com> for assistance.

Adaptive Monitoring to Support Adaptive Management

- 1 Adaptive monitoring in support of adaptive management in rangelands**
Sarah E. McCord, David S. Pilliod
- 8 Sampling design workflows and tools to support adaptive monitoring and management**
Nelson G. Stauffer, Michael C. Duniway, Jason W. Karl, Travis W. Nauman
- 17 Ten practical questions to improve data quality**
Sarah E. McCord, Justin L. Welty, Jennifer Courtwright, Catherine Dillon, Alex Traynor, Sarah H. Burnett, Ericha M. Courtright, Gene Fults, Jason W. Karl, Justin W. Van Zee, Nicholas P. Webb, Craig Tweedie
- 29 Lessons given and learned from rangeland monitoring courses**
Beth A. Newingham, Emily Kachergis, Amy C. Ganguli, Baili Foster, Lauren Price, Sarah E. McCord
- 39 Where do qualitative assessments fit in an era of increasingly quantitative monitoring? Perspectives from Interpreting Indicators of Rangeland Health**
Nika Lepak, Beth A. Newingham, Emily Kachergis, David Toledo, Jennifer Moffitt
- 50 Adaptive monitoring for multiscale land management: Lessons learned from the Assessment, Inventory, and Monitoring (AIM) principles**
Emily Kachergis, Scott W. Miller, Sarah E. McCord, Melissa Dickard, Shannon Savage, Lindsay V. Reynolds, Nika Lepak, Chris Dietrich, Adam Green, Aleta Nafus, Karen Prentice, Zoe Davidson
- 64 Monitoring grazing use: Strategies for leveraging technology and adapting to variability**
Vincent Jansen, Alexander C.E. Traynor, Jason W. Karl, Nika Lepak, James Sprinkle
- 78 Guiding principles for using satellite-derived maps in rangeland management**
Brady W. Allred, Megan K. Creutzburg, John C. Carlson, Christopher J. Cole, Colin M. Dovichin, Michael C. Duniway, Matthew O. Jones, Jeremy D. Maestas, David E. Naugle, Travis W. Nauman, Gregory S. Okin, Matthew C. Reeves, Matthew Rigge, Shannon L. Savage, Dirac Twidwell, Daniel R. Uden, Bo Zhou
- 87 Leveraging rangeland monitoring data for wildlife: From concept to practice**
David S. Pilliod, Jeffrey L. Beck, Courtney J. Duchardt, Janet L. Rachlow, Kari E. Veblen
- 99 Monitoring for adaptive management of burned sagebrush-steppe rangelands: addressing variability and uncertainty on the 2015 Soda Megafire**
Matthew J. Germino, Peter Torma, Matthew R. Fisk, Cara V. Applestein
- 111 Adaptive grazing management in semiarid rangelands: An outcome-driven focus**
Justin D. Derner, Bob Budd, Grady Grissom, Emily J. Kachergis, David J. Augustine, Hailey Wilmer, J. Derek Scasta, John P. Ritten

Front Cover: This graphic depicts elements of adaptive monitoring in working rangelands, all linked together by three monitoring transects laid out in a spoke design typical of rangeland monitoring plots. Graphic art by Tiffany Pereira.

Top: Structure from Motion (SfM) derived point cloud from Unmanned Aircraft Systems (UAS) imagery collected at Reynolds Creek Experimental Watershed in southwestern Idaho; intensity (reflectance) displayed in false color; Anna Roser flew and processed the data and Josh Enterkine created the image at the Boise Center Aerospace Laboratory at Boise State University.

Bottom: Technician flying multispectral imager on a UAS to study post-fire spatial patterns of invasive annual grasses and sagebrush; location south of Hot Springs/Bruneau in southwestern Idaho; photo by Silvia Perritte.

Right: Ranchers moving cattle in the Owyhee Mountains, southwestern Idaho; photo by David Pilliod.

Center: Field technician collecting line-point-intercept (LPI) data along a transect in a monitoring plot in eastern Oregon; photo by David Pilliod.
